설교제목 (SERMON TITLE):
성경이 말한다 III- 인종
(THE BIBLE SPEAKS III-RACE)

June 16, 2024
이상민 목사 (Pastor Sangmin Lee)

Genesis 1:26–28

26 Then God said, “Let us make mankind in our image, in our likeness, so that they may rule over the fish in the sea and the birds in the sky, over the livestock and all the wild animals, and over all the creatures that move along the ground.” 27 So God created mankind in his own image, in the image of God he created them; male and female he created them.

Genesis 1:26–28

**28 God blessed them and said to them,
“Be fruitful and increase in number; fill the
earth and subdue it. Rule over the fish in
the sea and the birds in the sky and over
every living creature that moves on the
ground.**

창세기 (Genesis) 1:26-28

26 하나님이 이르시되 우리의 형상을 따라 우리의 모양대로 우리가 사람을 만들고 그들로 바다의 물고기와 하늘의 새와 가축과 온 땅과 땅에 기는 모든 것을 다스리게 하자 하시고 27 하나님이 자기 형상 곧 하나님의 형상대로 사람을 창조하시되 남자와 여자를 창조하시고 28 하나님이 그들에게 복을 주시며 하나님이 그들에게 이르시되 생육하고 번성하여 땅에 충만하라, 땅을 정복하라, 바다의 물고기와 하늘의 새와 땅에 움직이는 모든 생물을 다스리라 하시니라

Our History Book...

CHAPTER 2

◀ Humans living 2 million years ago shaped stone and animal bones into simple tools.

Early Hominids

2.1 Introduction

In Chapter 1, you explored cave paintings made by prehistoric humans. Scientists call these prehistoric humans **hominids**. In this chapter, you will learn about five important groups of hominids.

You've already met three kinds of "history detectives"—archeologists, historians, and geographers. The study of hominids involves a fourth type, paleoanthropologists. Anthropologists study human development and culture. Paleoanthropologists specialize in studying the earliest hominids. (*Paleo* means "ancient.")

In 1974, an American paleoanthropologist, Donald Johanson, made an exciting discovery. He was searching for artifacts under a hot African sun when he found a partial skeleton. The bones included a piece of skull, a jawbone, a rib, and leg bones.

After careful study, Johanson decided the bones came from a female hominid who lived more than 3 million years ago. He nicknamed her "Lucy" while he was listening to the song "Lucy in the Sky with Diamonds," by the Beatles. She is one of the earliest hominids ever discovered.

What have scientists found out about Lucy and other hominids? How were these hominids like us? How were they different? What **capabilities**, or skills, did each group have? Let's find out.

The timeline shows the evolution of hominids from 4 million years ago to the present. It includes the following groups: *Australopithecus afarensis* (4 million years ago), *Homo habilis* (3 million years ago), *Homo erectus* (2 million years ago), *Homo sapiens neanderthalensis* (1 million years ago), and *Homo sapiens sapiens* (Modern humans, 0 years ago). The timeline is represented by a horizontal arrow with a red dot at each major time point. Below the arrow, small illustrations of each hominid are shown. The background of the timeline is a light blue and white pattern.

Use this timeline as a graphic organizer to help you study five groups of hominids.
