Fossils: Psittacosaurus

**“Tianyu Museum of Nature:
the biggest dinosaur museum
on earth, ... more than 1,100
fossilized dinosaurs...”**

Why so Little left...?

“Much less than 1% are land vertebrates. Usually consist of less than one bone”

Main Points of the Fossil Record

- Sudden appearance of basic types
- Complexity at the start
- No transitional forms between types
- Many fossils found through the column
- Fossils found in catastrophic deposits

What is issue?

A Paleontologist say ...

Colin Paterson

“I fully agree with your comments on the **lack of evolutionary transitions in my book**. If I knew of any, fossil or living, I would certainly have included them. I will lay it on the line—**there is not one such fossil...**”

Dr. Colin Paterson, Senior Paleontologist, British Museum of Natural History in correspondence to Luther Sunderland quoted in *Darwin's Enigma* 1988 p. 89

Formation: Slow vs Fast?

Catastrophic

Causes sudden burial

Slow and gradual

Burial.. or, decay?

BURIED

Dinosaurs Millions Years Old ?

CALIFORNIA'S NESSIE

Pondering the possibility that pre-historic creatures survive in the Pacific

BY WILLIAM C. ROBERTS

For hundreds of years, sailors have reported seeing huge dragon-like creatures that have surfaced near—and sometimes attacked—unwary ships and crews plying the world's seas. From the far Arctic Ocean to the deep, land locked Loch Ness, the large snake-like beasts that swim with their heads held high above the water blowing clouds of spray from their mouths terrified sailors who called them "sea serpents." Do they really exist or are they figments of the imagination of uneducated seafarers who spend too much time near the rum cask?

The ocean is the world's last great frontier and many areas of this vast body of water remain unexplored to this day. It is the age of the dinosaurs and occasionally are seen by humans.

Off the coast of Central California lies a mysterious underwater trench that extends many miles into the Pacific. Known as the Monterey Submarine Canyon, it is one of the deepest and least studied chasms in the sea.

For more than 100 years, sailors and fishermen in the vicinity have reported sightings of unusual marine animals, huge fish of strange descriptions, mysterious forms swimming beneath the waves and freak water conditions and currents that spring up for no apparent reason. Parts of the submarine canyon have even been described as having bottomless pits.

Spectators came from miles around to view the "sea monster" that washed up on Moore's Beach near Santa Cruz in 1935.

shore, without striking bottom. To add to the mysterious appearance

Skin Diver Nov. 1989

E.L. Wallace,
president of
the Natural
History
Society of
British
Columbia

**Skin Diver
Nov. 89**

"My examination of the monster was quite thorough It had no teeth. Its head is large and its neck fully 20 feet long. The body is weak and the tail is only three feet in length from the end of the backbone . . . with a bill like it possesses, it must have lived on herbage and undoubtedly inhabited a swamp. I would call it a type of plesiosaurus."

Another witness, Judge W.R. Springer of Santa Cruz, felt the creature was from a prehistoric age. He added his observation: "evidence of two short feet or flippers, and probably swam with its head high above the water."

Dinosaurs Millions Years Old ?

Scientists study rare dinosaur skin fossil to determine skin colour for first time

Apr 29, 2013

University of Regina physicist Mauricio Barbi and a rare hadrosaur skin sample.

The research...at NCSU, explains how proteins –and possibly even DNA -can survive millennia...raised this question in 2005, when they found the soft tissue ... of an adolescent T. rex ... in Montana.

This fragment of demineralized tissue lined the marrow cavity of a T. rex femur. The demineralized fragment in “A” was flexible and resilient. When stretched, as shown by the arrow, it returned to its original shape. “B” shows the same fragment after air-drying...”

"As we excavated the fossil, I thought that we were looking at a skin impression. noticed a piece came off and I realized this is not ordinary – this is real skin. Ev involved with the excavation was incredibly excited and we started discussing projects right away."

Living Fossils

**Dr. Carl
Werner**

Dr. Carl Werner was challenged by a classmate, saying “I bet you can’t prove evolution.” Disturbed by him,, he (a biology major at the time) ...began his quest for an answer... read ...on evolution, including paleontology, geology, biology... After 18 years of study, .. begin a series of experiments ..to test evolution. For the next 17 years, 1997-2014, ...traveled to the best museums and dig sites around the globe, photographing thousands of original fossils and the actual fossil layers ...”

Review: Experimental vs Origins Science

He was driving too fast
when we found him !!!

Origins science

Experimental science

How long time...?
How many laps...?

.....

→ measurable??

➤ If no past info?

→ Unprovable!!

How fast...?
What size car...?
Color....?

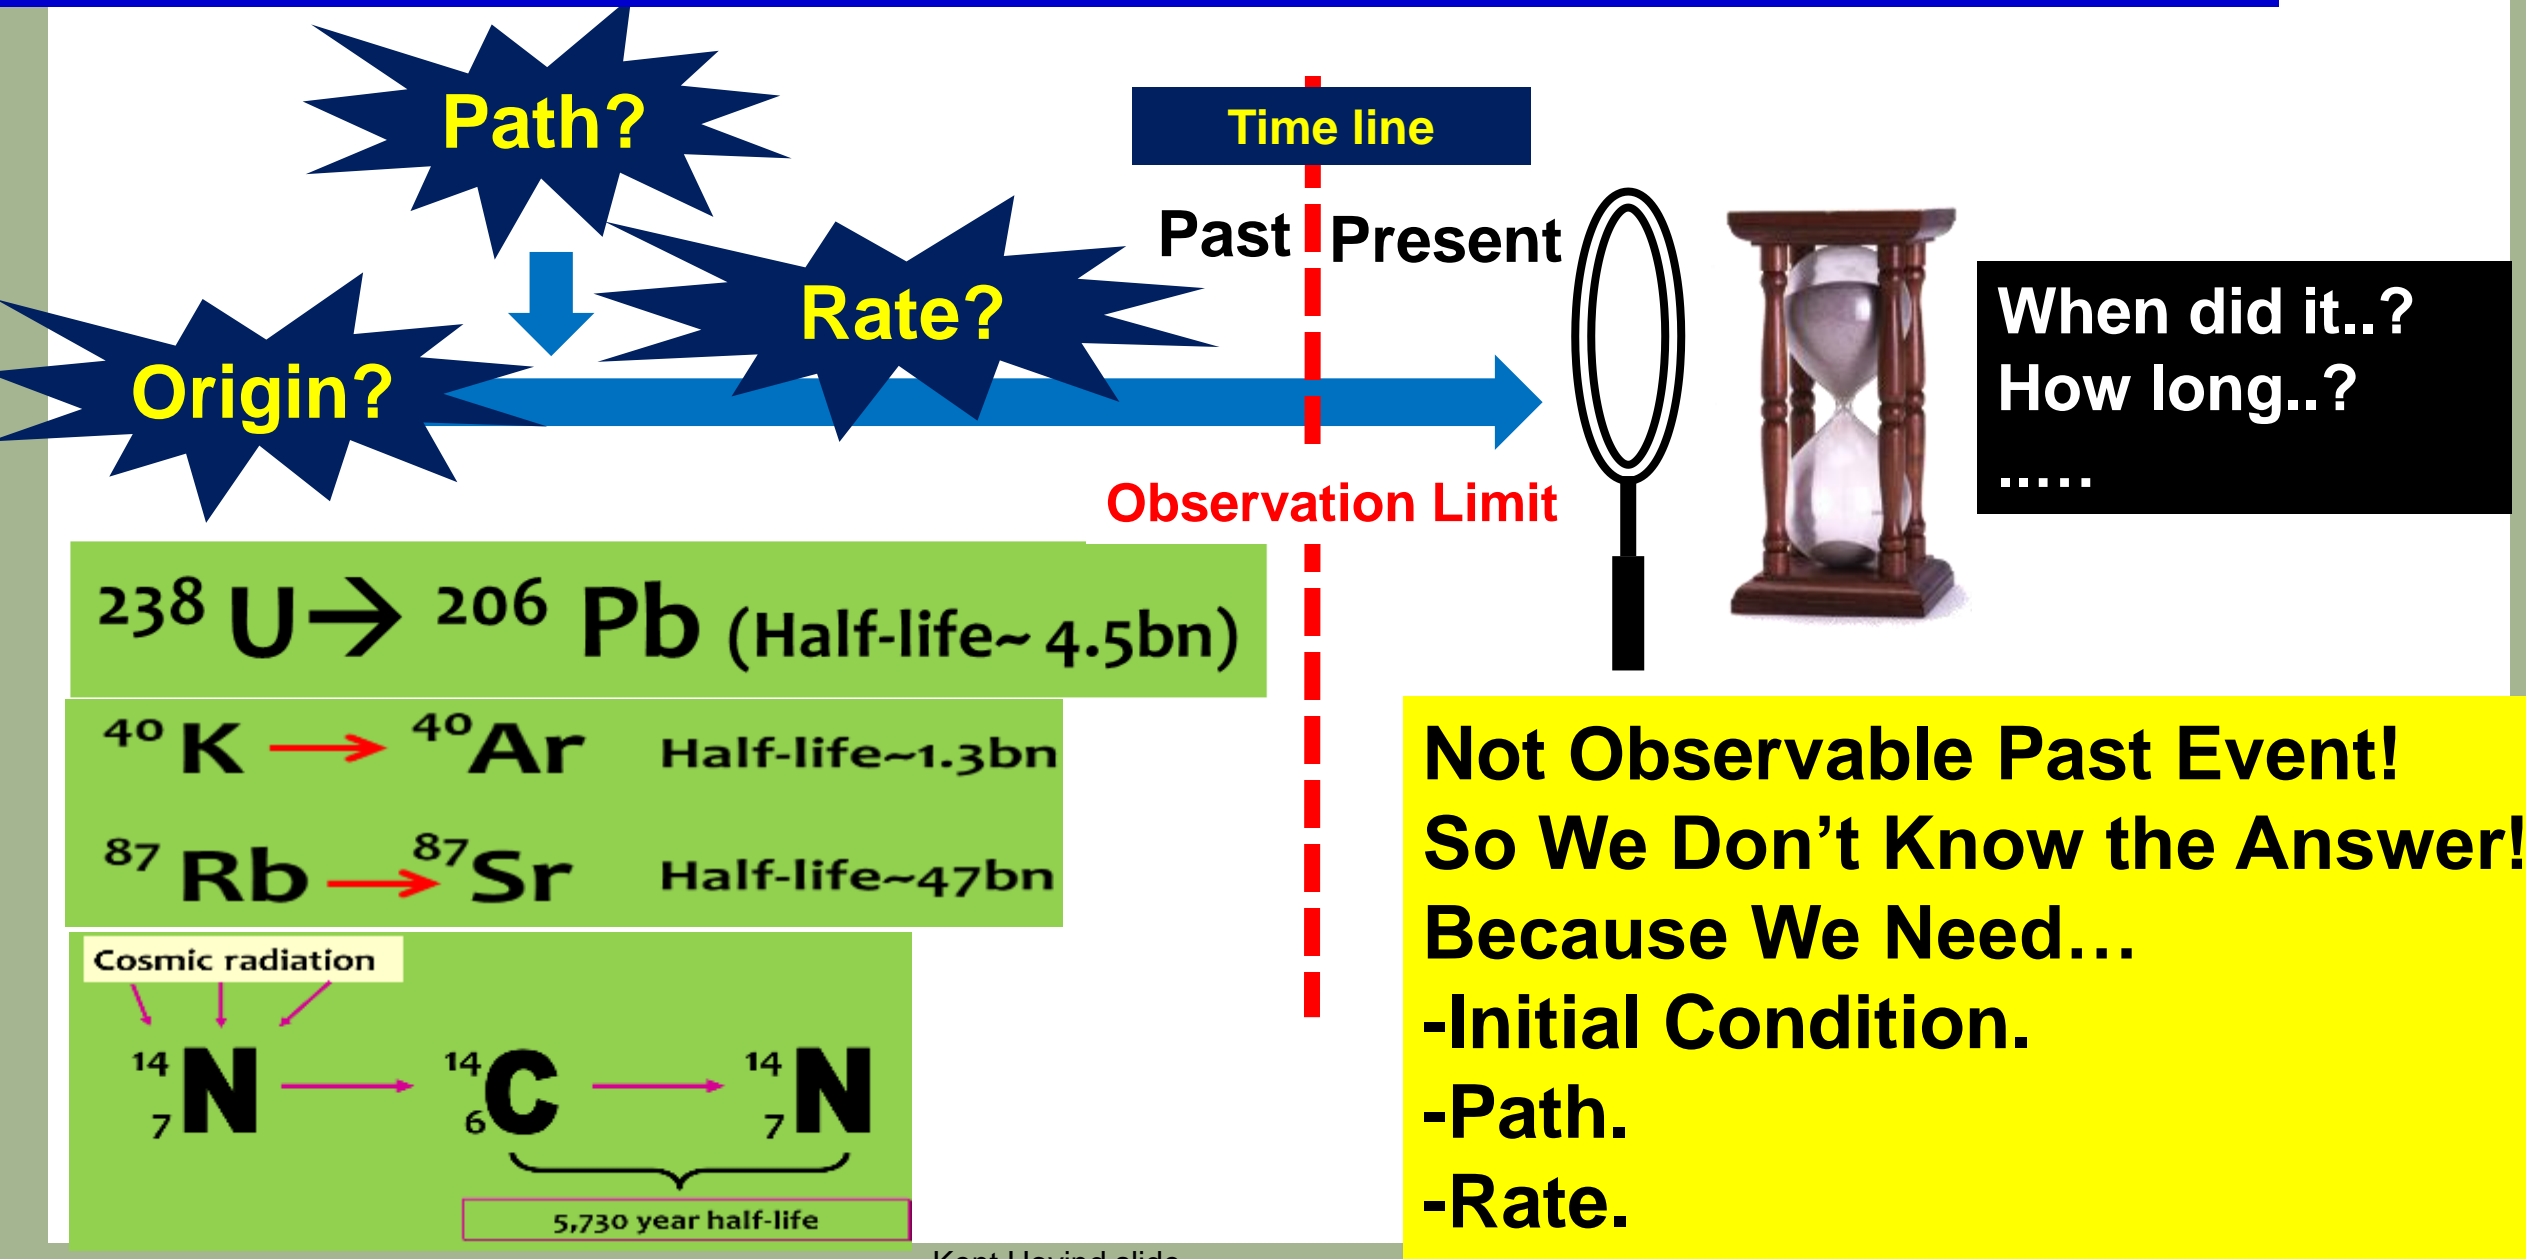

.....

→

All measurable!!

→ Know
the answer!!

Review: Radiometric Dating Assumes...

Reality ...?

“In conventional interpretation of **K-Ar** age data, **it is common to discard ages which are substantially too high or too low compared** with the rest of the group or with other available data such as **the geological time scale.**”

Hayatsu, A., “K-Ar Isochron Age of the North Mountain Basalt, Nova Scotia,” *Canadian Journal of Earth Sciences*, Vol. 16 April, 1979, pp. 973-975
