Evolution for Some...

A Harvard professor
says ...

E.O. Wilson
(1929-)

As were many persons from Alabama, I was a born again Christian. When I was 15, I entered the Southern Baptist Church with great fervor and interest in the fundamentalist religion. I left at 17 when I got to the University of Alabama and heard about evolutionary theory.

E.O. Wilson, professor of sociobiology at Harvard University,
The Humanist, September, 1982, page 40.

Macro-Evolution

Upward progression

1. A beneficial mutation
2. Natural selection over any existing genes
3. Inheritance by offspring

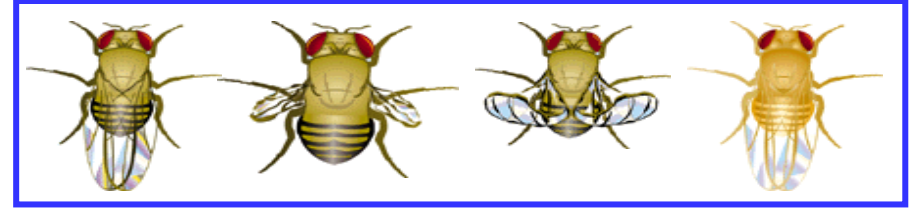

“Requires the addition of new genetic information”

Micro vs Macro...?

Finches: Different beak shapes

Fruit Flies

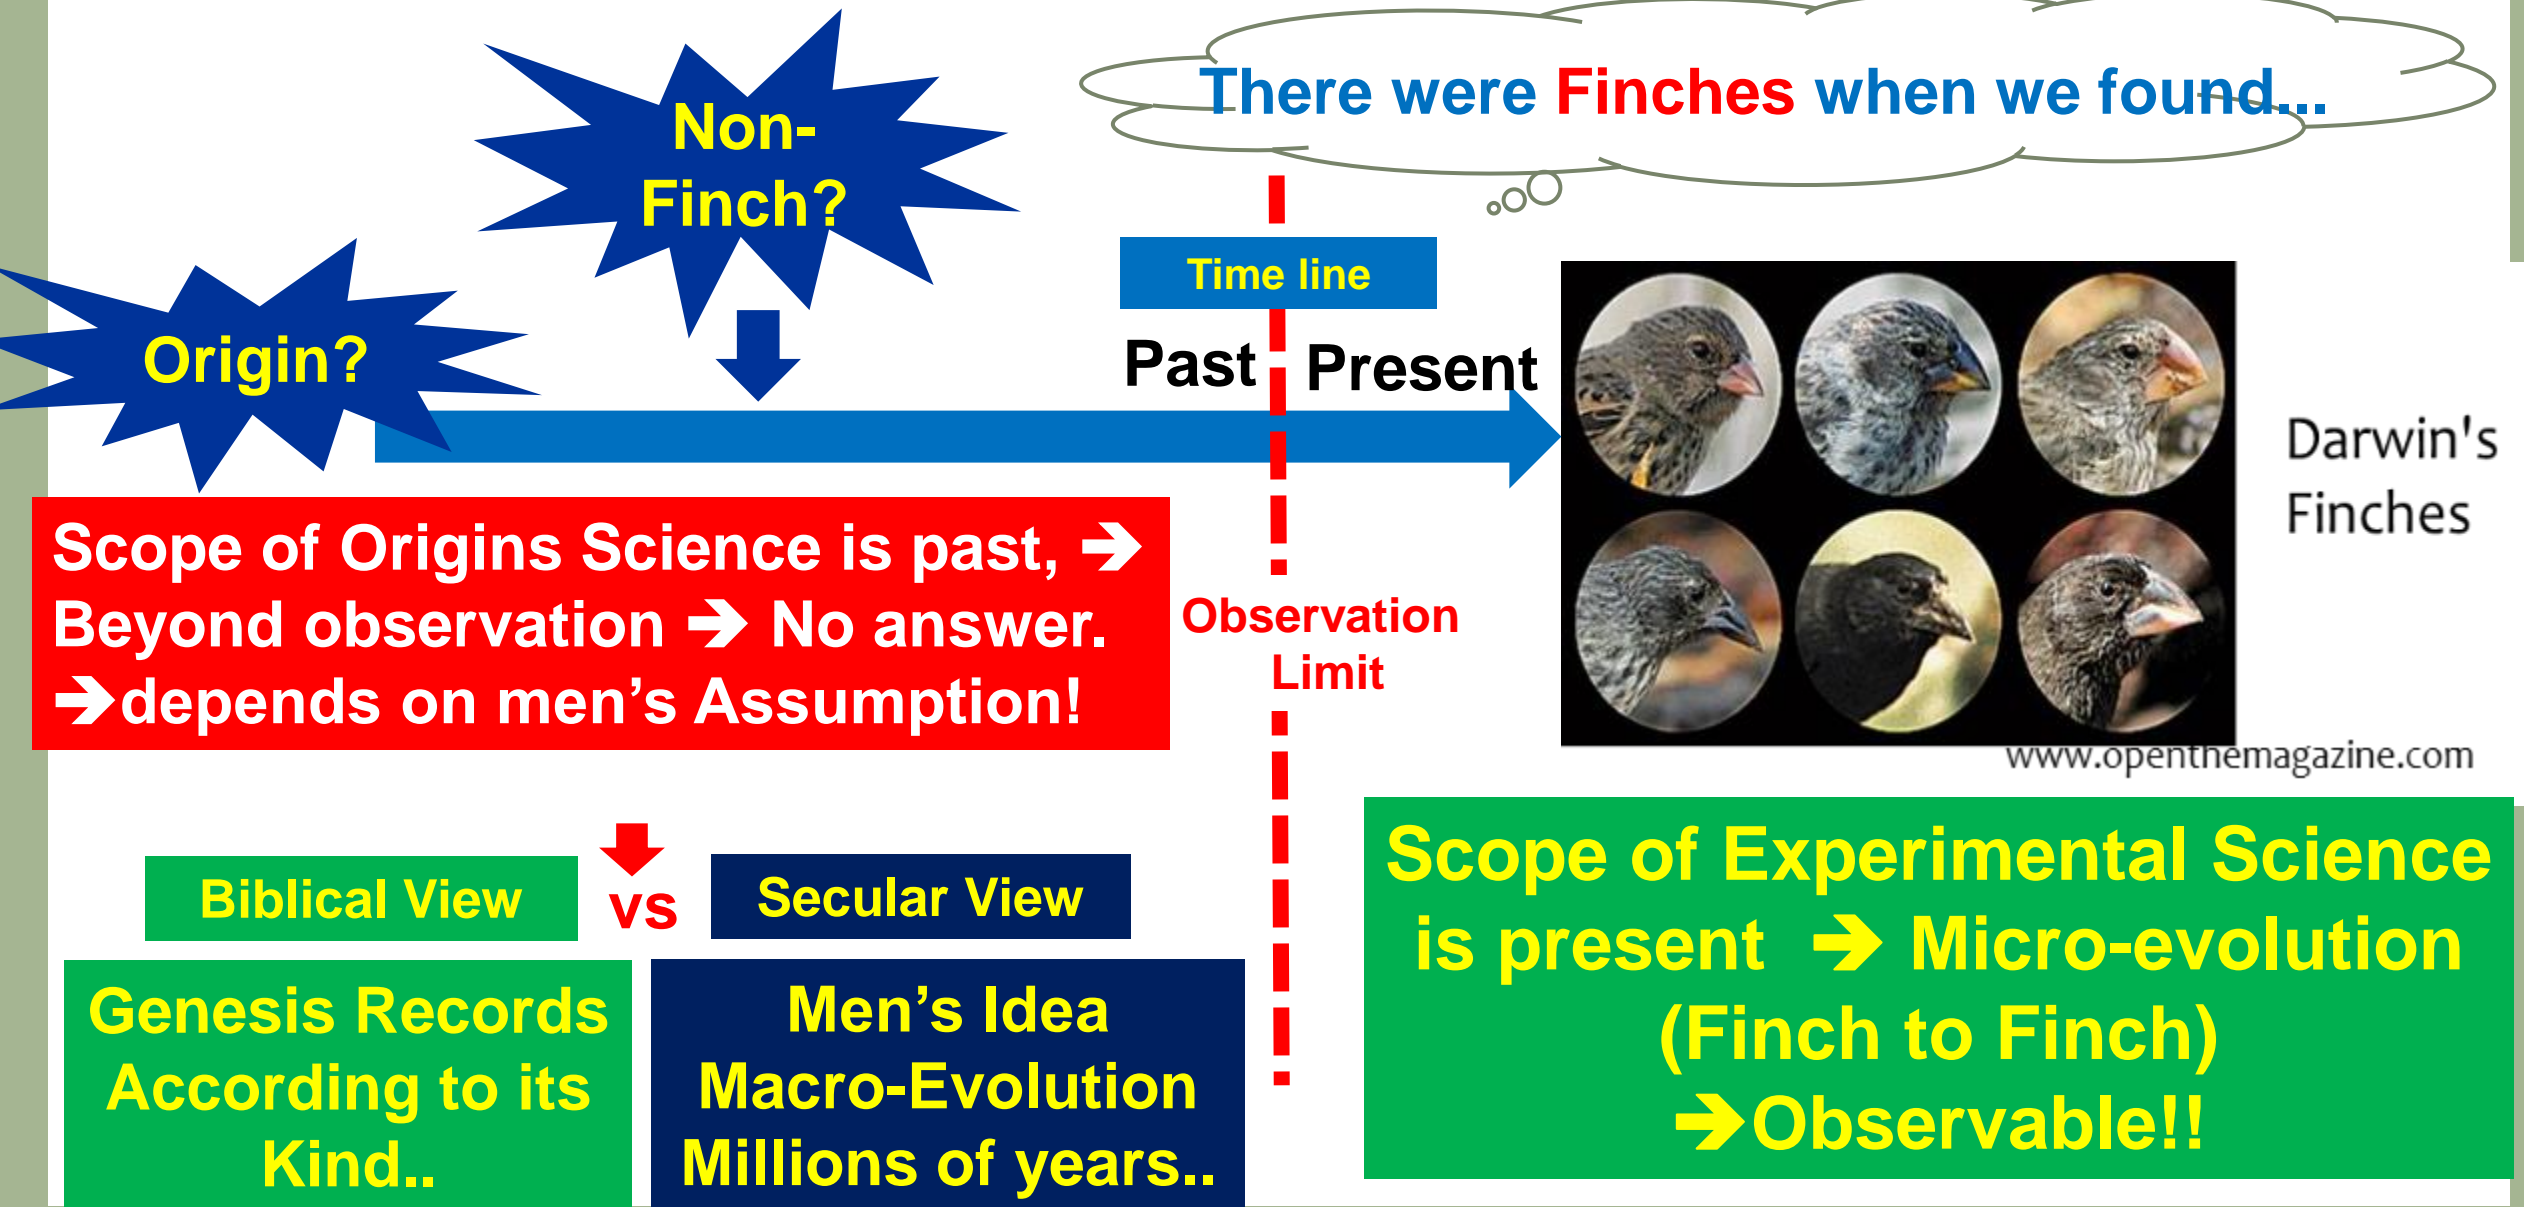

- What did we start with?
- What did we end with?

- Selection from existing information
- Loss of information

Can natural selection cause one kind (species) to become a new kind?

“Preliminary data and images from the James Webb Space Telescope (JWST) challenge secular ideas of galaxy formation and the big bang, but confirm biblical creation...”

“Creation Cosmology Confirmed!”

James Webb Space Telescope

Secular Predictions for JWST

1. Fewer galaxies at great distances. None beyond redshift 14
2. Farthest/Earliest galaxies low mass, clumpy and irregular.
3. Farthest galaxies have only Pop III stars – no heavy elements.

Jason Lisle

Creation Predictions for JWST

- ✓ 1. Lots of galaxies at great distances even beyond redshift 14
- ✓ 2. Farthest galaxies fully-formed (massive and well structured)
- ✓ 3. Farthest galaxies have Pop I and Pop II stars – detectable heavy elements.
